

# ENVIRONMENTAL SENSITIVITY AND KNUCKLEHEAD WARNINGS

Although Nielsen Killowatt amplifiers are constructed with reasonable care and diligence, they are fragile works of art which consist of used materials and components and no warranty is expressed or implied, and they are not represented as being suitable for professional use- or for any other use, for that matter.

## **USER BEWARE!**

- There are no user-serviceable parts inside this amplifier. There are however a lot of dangerous electrons inside whose acquaintance you do NOT want to make, so do not open up the insides of this amplifier unless you know damn well what the hell you are doing, which is unlikely.
- This amplifier contains enough matter that plumb bobs nearby will hang askew, in violation of local and state law. To avoid hernias and/or compression fractures of vertebrae, two people should carry amplifier at all times.
- This amplifier is loud enough to make your ears bleed during use. If your ears bleed during use, discontinue use and seek medical attention.
- Do not use this amplifier in an enclosed space without adequate ventilation. Do not deliberately concentrate and inhale the fumes of this amplifier. If fumes are inhaled, remove victim to fresh air and administer CPR if necessary.
- Do not look directly at this amplifier for extended periods of time without approved eye protection. If amplifier gets in your eyes, flush liberally with water and induce vomiting.
- Do not listen directly to this amplifier for extended periods of time without approved ear protection. If amplifier gets in your ears, flush liberally with vomit and induce watering.
- Do not handle this amplifier for extended periods of time without approved skin protection. If amplifier gets on your skin, vomit liberally with water and induce flushing.

- Do not leave this amplifier in prolonged contact with gasoline, vaseline, linoleum, petroleum, vacuum, oatmeal, or chromic acid.
- Actual mileage may differ and will probably be lower in the state of California, where this amplifier is known to cause birth defects and cancer in laboratory animals.
- All amplifier stunts performed by trained professional drivers on special course upon approval of credit and are not available in all stores- check your local newspaper for details.
- Do not use this amplifier while texting, swimming, skydiving, snowboarding, bungee-jumping, in deep space, or while standing on a ladder or on a wet floor in your bare feet. Plug it in when ready to use and unplug it when ready for bed.
- Do not attempt this amplifier at home.
- Enjoy responsibly.
- Use care when opening amplifier, as contents may have shifted during flight.
- This amplifier was made with milk which does not contain bovine growth hormone. However, no adverse health effects are associated with the use of BGH.
- Be sure to re-apply this amplifier after swimming for continued protection against sunburn.
- This amplifier was not intended to be a factual statement.
- Spit out amplifier and rinse after use.
- Nutritional information is based on serving size of one (1) amplifier.
- No animals were killed or injured during testing of this amplifier.
- Place amplifier on ground, light fuse, and get away. Do not throw. Use only under adult.
- Do not eat or drink this amplifier. Do not insert it into any orifice of your body or of anyone else's body.
- This amplifier depends on what your definition of "is" is.
- If you encounter this amplifier while hiking, speak loudly, wave your arms to make yourself appear bigger, and walk slowly away without turning your back.
- This amplifier was made on machinery used to process wheat and peanut products.
- This amplifier is not dishwasher, microwave, or oven-safe. Do not immerse in water.
- Objects in this amplifier are closer than they appear.
- Do not administer amplifier along with monoamine oxidase inhibitors, or cardiac arrest may result.

- Dry-clean amplifier only and drip-dry away from sunlight. Touch-up with cool iron.
- Do not put this amplifier in the trash. Amplifier may explode if disposed of in fire.
- Do not shake amplifier before opening. While opening, point amplifier away from others.
- Even if not inhaled, this amplifier may cause cancer of the mouth.
- Do not use amplifier to polish sterling silverware or silverplate.
- This amplifier contains content inappropriate for children (language, drugs, adult situations, nudity). Under 13 must be accompanied by adult.
- Amplifier may cause discoloration of some plastics. Test first on inconspicuous surface.
- This amplifier intensifies the effects of alcohol and other drugs on the central nervous system and may cause drowsiness. Do not drive while taking this amplifier.
- Enjoy amplifier within 7 days or freeze for later use. Cook to an internal temperature of 160 degrees F. Wash hands and cutting board thoroughly.
- Amplifier is sold by weight, not volume. Some settling of contents may have occurred during shipment.
- If fever, redness or swelling persist for more than three days, unplug amplifier and seek medical attention.
- This amplifier is not a toy. Do not use this amplifier to line crib, or allow young children to suffocate on it.
- Apply amplifier in several light coats rather than one heavy coat. Allow at least 30 minutes for amplifier to dry between coats. Clean brushes with paint thinner and dispose of rags properly.
- Sprinkle amplifier on ground at night, when slugs are active. Keep away from food crops and pets. Re-apply after heavy rain.
- Do not introduce this amplifier into the sewer or a storm drain that empties into any public watercourse.
- And finally, if at any time you are over 80, pregnant, and operating heavy machinery, ask your doctor for advice.
